- Ontario Health & Safety Awareness

SOFT SKILLS

- Incident management and technical documentation
- Strong problem-solving and analytical ability
- Clear, user-friendly communication

- Team collaboration and cross-department support
- Time management in high-demand environments
- Adaptability to new technologies and IT tools

ACADEMIC PROJECTS

Inventory Management System (Java, OOP)

Built a Java-based inventory system using object-oriented principles, interfaces, abstract classes, and exception handling. Implemented add/remove/search features and organized application structure using best OOP practices.

React Native Mobile App – Pokémon Lookup App

Developed a mobile application that fetches and displays Pokémon data using live API calls. Implemented search functionality, organized UI components, and optimized state management for smooth performance.
